Prices listed above can vary depending on client customization to shell and interior finishes. Clients have the option to stop the build out process at anytime, if the client wishes to finish it out. The client is required to pay for all services rendered and the building will be delivered and set up accordingly. Pricing does not include delivery or set up; pricing is according to building only. Connections of utilities are at the responsibility of the customer when a project is completed. Please note: Enterprise Supercenter is not a lender, and does not provide in-house financing for buildings with interior work. Rent To Own monthly payment estimates are for the SHELL only from Derksen. Interior work is considered aftermarket and does not qualify for the Rent To Own program as offered by Derksen Portable Buildings.
